

# Risk-Based Test Case Priority Matrix v1.0

What RBPM Combines	1. Potential Risks from RTM (Requirement Traceability Matrix) 2. Risk Impact & Likelihood analysis 3. Business Criticality (Must-Have vs Should-Have) 4. Security & E-commerce Vulnerabilities from OWASP Top 10: <a href="https://owasp.org/Top10/2025/">https://owasp.org/Top10/2025/</a>																																																																																																																																																															
Priority Score Formula	<p><b>Priority Score = (Impact Score) * (Likelihood Score) * MosCoW Type</b></p> <p>Risk Factors: Impact (1-5), Likelihood (1-5) MosCow Type: Must-have (1.20), Should-have (1.0)</p> <p><i>The priority score is used as a guideline for relative test execution prioritization.</i></p>
